Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 3, and 6 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Takahashi. See Figure 3 of Takahashi.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi. This claim is considered met by, for example, Figure 3 of Takahashi except for the tube 48 of Figure 3 of Takahashi being disclosed as formed of metal material. It would have been obvious to one of ordinary skill in the art at the time the invention was made to form the tube 48 of Figure 3 of Takahashi of metal, since applicant asserts no criticality in this particular feature, and to form the tube of metal or plastic would have been equally obvious to a person of ordinary skill in the art at the time the invention was made.

6. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi in view of Kobayashi et al. This claim is considered met by, for example, Figure 3 of Takahashi except for a portion of a line connected to a fuel filler pipe. Conduit C of Figure 2 of Kobayashi et al shows that it is well known to utilize a conduit connected to a fuel filler pipe. It would have been obvious in view of Figure 2 of Kobayashi et al to connect one of the vapor lines of Figure 3 of Takahashi to the fuel filler pipe for a similar purpose as disclosed in the drawing of Figure 2 of Kobayashi et al.

7. Claims 4-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
